

nnetwork

The image displays the word "nnetwork" in a stylized font. The first two "n"s are red, while the remaining letters "etwork" are dark gray. The letter "o" in "network" is replaced by a circular node. Five other small circular nodes are positioned around the "o" node, connected to it and to each other by red lines, forming a network structure. The connections are as follows: the top node connects to the top-left and top-right nodes; the top-right node connects to the top-right and bottom-right nodes; the bottom-right node connects to the bottom-right and bottom-left nodes; the bottom-left node connects to the bottom-left and top-left nodes; and the top-left node connects to the top-left and bottom-left nodes. The "o" node is connected to the top-right, bottom-right, and bottom-left nodes.
